DETAILED ACTION

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-8 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1,3,6,7,12,13,14 and 16 of prior U.S. Patent No. 6,611,568. This is a double patenting rejection.

Allowable Subject Matter

Claims 9-16 are allowed.

The following is an examiner's statement of reasons for allowance: None of the cited references discloses nor suggests the claimed invention including the frequency control loop generates a phase offset signal proportional to M/N as a function of an offset in phase between a variable frequency clock signal at a second variable frequency and a sample clock signal at a sample clock frequency, as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
